Course project evaluation criteria: Project report

Abstract (0p, but -5p if missing)

Introduction (15p):

There should be a description of the history of the ultrasound method of your topic (3p).			
1p	2p 3p		
Brief description with	Careful description, which is	Careful and correct description	
inconsistencies	mostly correct		

There should be a description of the physics of the ultrasound method of your topic (3p).				
1p	2p	3p		
Brief description with some	Careful description, which is	Careful description, which is		
ultrasound phenomena	mostly correct and contains	correct and contains 2-3 most		
	2-3 most relevant	essential ultrasound phenomena,		
	ultrasound phenomena	also less relevant phenomena		
		considered		

Clinical or research applications (4p).				
1p	2р	Зр	4p	
Brief description	Moderate	Careful	Careful and correct description	
with inconsistencies	description with	description,		
	some	which is		
	inconsistencies	mostly		
		correct		

References (5p):

0.5p per relevant reference up to 10 references.

Aims (2p):

Aims (of the experiment) should be the last paragraph of the Introduction. Describe in the aims paragraph what aspect of your topic you are going to investigate in the study (1p) and why is it			
relevant to the field (1p).			
1p	1p		
Aim clearly described	Relevancy of the aim clearly explained		

Materials and methods (10 p):

2р	4p	6р	8p	10p
methods	methods and	methods and	methods and	methods and
and	equations	equations well	equations very well	equations very clearly
equations	explained with	explained with	explained with mostly	and correctly
explained	few unclarities	somewhat	correct illustrations	explained with correct
with errors		correct		and meaningful
		illustrations		illustrations

Results (10 p):

2р	4р	6р	8p	10p
essential results explained with errors	essential results with few unclarities	essential results explained with somewhat correct illustrations and plots	essential results well explained with mostly correct illustrations and plots	essential results explained very clearly and correctly with correct and meaningful illustrations and plots

Hint: show quantitative results

Discussion (10 p):

2p	4р	6р	8p	10p
results	results	results well	results very well	results excellently
connected to	somewhat	connected to the	connected to	connected to the
the clinical	connected to	clinical	the clinical	clinical application
application with	the clinical	application with	application with	with correct
few erroneous	application with	somewhat	somewhat	physical
physical	few correct	correct physical	correct physical	interpretations on
interpretations	physical	interpretations	interpretations	sound-tissue -
on sound-tissue	interpretations	on sound-tissue -	on sound-tissue	interactions.
-interactions.	on sound-tissue	interactions.	-interactions.	Careful limitations
Limitations	-interactions.	Limitations	Limitations	analysis exists and
analysis	Limitations	analysis exists	analysis exists	is correct.
missing.	analysis exists	and is somewhat	and is mostly	
	but has few	correct.	correct.	
	misconceptions.			

Hint: Limitation analysis can be written.

Conclusions (3 p):

1p for each conclusion correctly addressing the aim of the project (up to 3 conclusions).
