Aaro Vasama \\ ENY

BÅULDER is a new kind of climbing wall actuated by 4 sprung joints and two strings.

With **BÅULDER** every climber will get the best out of their indoor training.

BÅULDER will change the way you see indoor climbing walls.

Our goal was to make a simple yet dynamic climbing wall which could also be actuated depending on the climbers preferences.

With these goals in mind our team set to work and so the **BÅULDER** was born.

4 **DEGREES**
Of freedom

2 **STRINGS**
To control

1 **PACKAGE**
For all your bouldering needs
